Dustless

Environmental Dust Control

- Increased Productivity, Efficiency & Safety
- Dependable Protection
- Instant Results and Benefits
- No Special Equipment Necessary
- Environmentally Friendly

Frequent process delays, costly shut downs, and low equipment productivity due to extensive dust are major problems on construction sites and are on the increase. Ever increasing Dust Control regulations require more effective, comprehensive environmental solutions.

Dustless is a new product to the New Zealand market offering long-lasting, non-hazardous dust control solution that eliminates human related health risks to workers bystanders and abutters on all construction sites or dirt/gravel roads by eliminating airborne dust. Dustless enables equipment to operate at peak efficiency with reduced maintenance costs, less wear and tear, and minimal downtime.

Dustless is specifically produced to work in areas which the surface will be continuously disturbed, thereby rendering most conventional dust control systems less effective or even totally ineffective. Unlike other common products, Dustless lasts up to one complete season.

Once Dustless is applied, watering will never be necessary.

HOW CAN **Dustless?** HELP ME ■

Increase productivity and Eliminate Hurdles Using Dustless for:

- Construction roads (short or long term)
- Dirt Roads
- Race and Motocross Tracks
- Parking Areas
- Haul Roads
- Mining Roads and Quarries
- Other locations where the surface is constantly being disturbed.

IS **Dustless?** SAFE ■

YES, Dustless is a blend of high tech, clear, safe, odourless, organic fluids, that is highly re-fined, proven to be nontoxic to humans, animals, marine life and plants.

WHY IS **Dustless?** THE SOLUTION ■ FOR YOU

- It helps provide a safe work environment
- It protects from costly delays or shutdowns due to regulatory issues
- It gives you peace of mind for up to 12 months
- It enables you to resume operation immediately after application
- It keeps your site clean, protected, and efficient
- It allows you to use your existing equipment for successful applications

Other values you will receive by using Dustless for your operations:

- The Product is safe, clean, and non-toxic
- One application delivers long term dust control
- Protection is reliable on all kinds of construction sites
- Does not freeze in cold weather
- Maintains traction - no slippery surfaces
- Does not evaporate
- Does not wash away
